TO ALL NEIGHBORHOOD LEADERS:

Enclosed you will find some garden notes that may be helpful in reminding you and those in your neighborhood about what needs to be done at this time to produce the food that will be needed for the family. We will send this to you each month suggesting the things to be done in order that you might use it to the best advantage in keeping your people informed.

Now, more than ever, it seems important that we should try to produce all the food that will be needed on the farm. Conditions, so far, are no better than they were when we met, and all the pushing you can do to get the people to properly feed themselves is important. If we can be of any help to you in any of your programs, please feel free to call on us.

Very truly yours,

M. A. Morgan,
County Agent
